## MADA SELF DRILLING SCREW

## Product Description

Field of Application

Manufacturing
Standards
Product
Characteristics

Mada Self Drilling bugle head screws also known as Tek screws, eradicate the need for a pre-drilled hole and allow drilling and tie to be done in the same motion. It is used for fastening drywall and other accessories mounting on steel structures from 0.90 mm up to 3.0 mm thick.

Mada Self Drilling screw has fine thread, drill point providing good control in driving and a wider area than flat heads.

Applicable for all drywall systems and other such applications. Requires less torque to drive than a standard twin fast drywall screw.

In compliance with ASTM C954.

| Parameters | Details |
| :--- | :--- |
| Head Type | Bulge |
| Coating | Yellow Zinc, White Zinc or Black Phosphate |
| Thread Type | Single Lead |
| Drive Type | \#2 Phillips |
| Material | Hardened Steel, AISI 1018 or equivalent steel |
| Case Hardness | Minimum Rockwell C44 |
| Plasterboard Type | $12.5 \mathrm{~mm}, 15 \mathrm{~mm}$ and 16 mm |
| Size $(\mathrm{mm})$ | $\mathrm{M} 3.5 \times 25, \mathrm{M} 3.5 \times 30, \mathrm{M} 3.5 \times 35, \mathrm{M} 3.5 \times 45, \mathrm{M} 3.5 \times 55$, |
|  | $\mathrm{M} 3.5 \times 60$ and $\mathrm{M} 4.2 \times 70$ |

- The dimensions and weight of the packaging vary depending on the size. Consider load centers when loading trucks.
- Puncture resistant gloves and safety goggles should used when handling the product.
- Store in dry conditions.
- The products do not pose a fire hazard. However, the protective coating may be combustible and can emit hazardous fumes. Use suitable extinguishing means: water, foam, carbon dioxide or dry powder.
- Overdriving may result in failure of the fastener or strip-out of the work surface.
- The Bugle head to be fully seated when the head is flush with the work surface.
- The products should not be used for purposes other than those shown on the Mada Technical Proposal.
