

MADA ROCKWOOL INSULATION

Technical Data Sheet

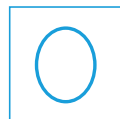

TDS-ACC-R08-Rev1 Mada Rockwool - June 2022

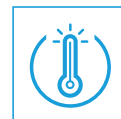

Advantage

Rot-proof.

Zero depletion
potential (ODP)

Zero global
warming
potential (GWP)

Reducing
green house
effect

Product Description

Rockwool is an insulating material manufactured from natural minerals mainly basalt which is melted at very high temperature and spun using advanced production techniques. The fibers are then bonded with minimum quantity of thermosetting resin binder and special additives. It has good Thermal & Acoustic properties, Rockwool is light in weight, strong, re-silent, and easy to handle cut intricate to suit shapes.

Field of Application

Applicable for all Drywall Systems and all such applications.

Manufacturing Standard

- Rockwool insulation complies to ASTM C665, ASTM C177, ASTM C518, BS 874:1986 and BS 476.
