Information Call  
Telephone: +966 14 325 3253

### Production Process

A water-based soluble lubricant is used to assist with the forming process. These soluble lubricants are not considered hazardous when used as recommended by the manufacturer.

### Composition

Chemical Name	CAS – Number	Weight in Percentage
Aluminium	7429-90-5	>95
Manganese	7439-96-5	<1.5

### Handling & Storage

Products are supplied in pack and sub-pack quantities and should be handled in accordance with the recommendations contained in AS 1470 – Health and Safety at Work Principles and Practice.

Where mechanical lifting or moving equipment is required, trained and licensed operators are to be used.

Metal products should be stored in an environmentally-friendly area away from airborne contaminants such as acid and salt sprays.
