

MADA (DHT) DEFLECTION HEAD TRACK

Technical Data Sheet

TDS-MM-R01-Rev2 Deflection Head Track - 2024

Product Description

Mada DHT (Deflection Head Track) supports the wall or soffit studs, allowing for the vertical deflection of floor beams and floor decks above. Our DHT track features a knurled surface for superior strength, increased stiffness, and less screw slippage.

Field of Application

Our Deflection Head Track (DHT) can be used for:

- Non-load bearing partition systems
- Liner systems
- Metal stud ceiling systems
- And other non-load bearing assemblies

CERTIFIED
CLEAN AIR GOLD

Tested and Certified to meet and exceed ASTM E119 for Fire Rated Systems
