

MADA MAIN CHANNEL

Technical Data Sheet

TDS-MM-R12-Rev2 Main Channel - 2024

Product Description

Mada Main Channels are the structural component of a metal stud ceiling system and are typically supported from the structure above with rigid hangers, adjustable clips, or hooked and tied wires. Our Main Channels feature a knurled surface for superior strength, increased stiffness, and less screw slippage.

Field of Application

- Metal stud ceiling systems
- Cinema System
- And other non-load bearing assemblies

CERTIFIED
CLEAN AIR GOLD

Tested and Certified to meet and exceed ASTM E119 for Fire Rated Systems
